

# Cadiz Absolute Yield Fund

REGULATION 28 COMPLIANT

## Fund Information

### FUND OBJECTIVE

The fund aims to provide investors with a return of 2% in excess cash over a rolling 3 years and a positive return over any rolling 12 month period. The fund is expected to deliver more consistent returns than an income fund and reduce the volatility inherent in the bond market. Great care is applied to protect the fund against incurring losses.

### WHAT DOES THE FUND INVEST IN?

The fund can invest in a combination of assets, such as government and corporate bonds, inflation linked bonds, listed property and cash both in South Africa and offshore. Derivative strategies such as swaps and futures may also be used for efficient portfolio management purposes and to mitigate downside risk. The fund does not invest in ordinary shares.

The intended maximum limits, (see underlying instruments mentioned below), may not exceed 25% of the value of fund:

- Listed property: up to 10%
- Preference shares: up to 10%
- International assets: up to 10%
- Hybrid instruments: up to 5%

The fund has a flexible mandate with no duration or maturity limits for its investments.

### WHO IS THE FUND SUITABLE FOR?

- Investors seeking a cash alternative to a bank deposit.
- Retirees who seek a managed exposure to income generating investments.
- Those who seek active management within the fixed interest universe.
- Investors who have at least an 18 month or longer investment horizon.

### INVESTMENT PROCESS

The fund is actively managed by an experienced team who are able to change the fund's duration depending on our view of the interest rate cycle and the valuation of fixed rate bonds. Derivatives are deployed to switch between fixed and floating rate exposure, which also mitigates the risk of volatility associated within the bond market.

There are no guarantees that the fund will always outperform cash over short periods of time and therefore capital losses are possible, especially in the case of negative credit events which may affect the underlying holdings. The fund's investments are subject to a stringent risk management process.

### FEES ON CLASS A (EXCLUDING VAT)

Initial fee: 0%

Annual Management fee: 0.80%

### PERFORMANCE FEE

None

### TOTAL EXPENSE RATIO (TER) AND TRANSACTION COSTS

Cadiz Absolute Yield Fund (Class A)

# Cadiz Absolute Yield Fund

REGULATION 28 COMPLIANT

## Quarterly Fund Manager Commentary – First Quarter 2019

### ECONOMIC AND MARKET COMMENT

The 1st quarter of 2019 was characterised by a strong rally in the Rand, and then an abrupt weakness which left the Trade Weighted Nominal Effective Exchange Rate of the Rand roughly unchanged at the end of the quarter. USDZAR strengthened from 14.38 at the start of January to 13.25 at the start of February, and then weakened back to close the quarter at 14.50. South African yields followed the currency lower, and then corrected sharply when the Rand weakened. On the 20th February, new Finance Minister Tito Mboweni delivered a generally downbeat Budget Speech, which highlighted the dire state of affairs at Eskom – and in addition, committed R67bn in support to Eskom over the next 3 years, and a total of R230bn over the next decade. This is one of the main reasons behind the significant deterioration in the fiscal deficit (as a percentage of GDP) – one of the key metrics Moody's (and all other rating agencies) monitors.

In spite of the woes at the Fiskus, SA government bonds rallied, due to a perception that the Budget was better than the market had expected, and our bonds were also boosted by a strong rally in global yields – mainly on the back of the Federal Reserve indicating that it would now be "on pause" for the rest of 2019. In fact, global bond and money markets are implying that the next move in the Fed Funds rate will be a cut. We disagree and expect at least one or two further hikes by the Fed in 2020. In addition, the ECB was forced to remove all talk of its first rate hike, and instead had to announce a new TLTRO III programme. TLTRO is an acronym meaning "Targeted Longer-Term Refinancing Operations" and is a measure that stimulates bank lending to the real economy – a way of increasing economic growth by providing cheap money to banks. This is a version of Quantitative Easing that the ECB is implementing.

Global bond yields generally rallied throughout the quarter, with the US 10yr treasury yield reaching a low of 2.33%, having started the quarter around 2.70%, as the Fed rate cuts were priced out. The 10yr German Bund yield plunged from 0.24% to -0.07% and there is no chance of an ECB rate hike in the near term. South African bond yields rallied, with the R186 yield falling from 8.87% to end the quarter at 8.58% - but it reached an intra-quarter high of 9.11% right after Minister Mboweni's Budget Speech. The yield curve steepened over the quarter, reflecting the deteriorating revenue collection at SARS and the higher budget deficit and increased bond issuance by National Treasury.

The SARB kept rates unchanged in their January and March MPC meetings. However, they emphasized that the current monetary policy stance is accommodative; we also have had significant petrol and electricity price increases which will put pressure on inflation towards H2 2019. Inflation will peak close to the 6% upper target, and then fall back to the middle of the 3% to 6% target range, around 4.5%

The bond market (All Bond Index) returned +3.76% for Q1 2019. Equity markets (represented by the JSE ALSI) were up 7.97% over the quarter and Inflation Linked Bonds (ILBs) returned +0.50% for the quarter. Cash returned +1.73% for the quarter. Rolling 12 month returns for bonds fell to +7.26%, equities have returned +5.04%, and ILBs were negative at -3.14% with cash returning 7.26% over the last 12 months.

### PORTFOLIO REVIEW AND OUTLOOK

We reduced the modified duration positioning of the Fund when risk aversion struck at the beginning of the quarter, and have tried to increase the liquid high quality assets in the Fund. The diversified holdings of Floating Rate Notes (FRNs) protected the fund in the rising short rate environment, and now that yields have fallen, we intend to increase holdings of FRNs. Our current House View on interest rates is that the SARB will hike again at some point in 2019. We will therefore reduce modified duration into strength as and when bond yields rally. We will continue to increase our exposure to Floating Rate Notes (FRNs) if attractive opportunities present themselves, in terms of credit spreads, even though investors continue to over-pay for credit of late. We will continue to exercise caution with our credit assessments before investing in credit assets.

# Cadiz Absolute Yield Fund

REGULATION 28 COMPLIANT

## Important information regarding terms of use

## Important information regarding terms of use

### GENERAL INFORMATION AND RISKS

1. Collective Investment Schemes in Securities (unit trusts) are generally medium to long-term investments.
2. The value of participatory interests (units) may go down as well as up and past performance is not necessarily a guide to the future. The manager does not guarantee the capital, nor the income of the portfolio.
3. Unit trusts are traded at ruling prices and can engage in scrip lending and borrowing.
4. Portfolios are priced daily and prices can be obtained from the website and in the daily newspapers or on Profile Data. Figures quoted are from Morningstar Inc.
5. Unit trust prices are calculated on a net asset value basis, which is the total value of all assets in the portfolio including any income accruals and less any permissible deductions (brokerage, UST, VAT, auditor's fees, bank charges, trustee and custodian fees and the annual management fee) from the portfolio, divided by the number of units in issue.
6. Different classes of participatory interests apply to this fund and are subject to different fees and charges.
7. Performance is shown for the most expensive class of the Fund and individual investor performance may differ as a result of initial fees, actual investment date, date of any subsequent reinvestment and any dividend withholding tax.
8. A schedule of fees, charges and minimum commissions is available on request from Cadiz Collective Investments.
9. Commissions and incentives may be paid, and if so, are included in the overall costs.
10. The manager has the right to close the portfolio to new investments in order to manage it more efficiently in accordance with the mandate.
11. Cadiz Collective Investments' portfolios are valued daily at 15:00. Instructions must reach Cadiz Collective Investments before 14:00 (11:00 for Cadiz Money Market Fund) to ensure same day value.
12. Transaction costs are necessary costs in administering the fund and impacts the fund returns. They should be considered in isolation as returns may be impacted by many factors over time including market returns, type of fund, the investment decisions of the investment manager and TER.

### IMPORTANT INFORMATION FOR INVESTORS:

#### Total Expense Ratio (TER)

- TER is a measure of a funds expenses relating to administration of the portfolio expressed as a percentage of the average daily value of the fund over a three year period. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return.
- The sum of the TER and transaction costs is shown as the Total Investment Charge. Since Fund returns are quoted after the deduction of these expenses, the TER and Transaction costs should not be deducted again from the published returns.

#### Regulation 28 Compliance

- Where indicated the fund is managed to comply with Regulation 28 of the Pension Funds Act. Exposures in excess of the limits will be corrected immediately, except where, due to a change in the fair value or characteristic of an asset, e.g. market value fluctuations, in which case they will be corrected within a reasonable time period.
- The Management Company does not monitor compliance by retirement funds with section 19(4) of the Pension Funds Act (item 6 of Table 1 to Regulation 28).

#### Foreign investment risk

The portfolio may include underlying foreign investments. Fluctuations or movements in exchange rates may cause the value of the underlying foreign investments to go up or down. The underlying foreign investments may be adversely affected by political instability as well as exchange controls, changes in taxation, foreign investment policies, restrictions on repatriation of investments and other restrictions and controls that may be imposed by the relevant authorities in the relevant countries.

#### Derivative risk

The use of derivatives may increase the overall risk in the Fund by multiplying the effect of gains and losses.

#### Maximum drawdown

- A maximum drawdown is the maximum loss from peak to trough of a portfolio.
- It is an indicator of downside risk over a specified time period.

#### Sharpe ratio

The sharpe ratio is the average return earned in excess of one risk-free rate per unit of volatility or total risk.

#### Risks associated with investing in fixed interest and Money Market investments

- A money market fund is not a bank deposit account.
- Fluctuations in the market value of the securities in which a fixed income fund invests may have a negative impact on the fund. The income instruments are likely to be especially sensitive to changes in interest rates or changes in the market participants' expectations of how interest rates will change in future.
- There is a risk that certain corporate and other counterparties with whom the manager invests or through whom the manager transacts run into financial difficulty, and are unable to honour their commitments in full, which will lead to a potential loss of capital.
- There is a risk that in a high inflation environment, the securities in the Fund may appreciate at a rate lower than the inflation rate, and as such, the purchasing power of an investor's capital may decline.

#### Complaints

Cadiz Collective Investments are committed to handling client complaints in a timely and fair manner and has implemented systems and procedures to satisfy this commitment. The detailed Complaints Handling and Resolution Procedure is available on the website, or can be requested directly from the manager. A complaint should be lodged in writing with the Compliance Officer at [investorservices@cadiz.co.za](mailto:investorservices@cadiz.co.za)

An investor can obtain, free of charge, additional information on the proposed investment including, but not limited to, brochures, application forms and the annual report and any half-yearly report.

#### About the Management Company

Cadiz Collective Investments (RF) (Pty) Ltd – Co. Reg. NO 2004/032263/07, is registered as a management company under the Collective Investment Schemes Control Act 45 of 2002. It operates 6 unit trust portfolios under the Cadiz Unit Trust scheme, and is supervised by the Financial Services Board ("FSB").
