

# Cadiz Money Market Fund

## Fund Information

### FUND OBJECTIVE

The fund aims to deliver high levels of income in excess of returns available through fixed term deposits and call accounts offered banks, while providing investors with capital protection and the stability of monthly returns and liquidity.

### WHAT DOES THE FUND INVEST IN?

The fund invests in a range of South African money market instruments. These assets include bankers' acceptances, debentures, negotiable certificates of deposit, treasury bills and call accounts. The fund may only invest in money market instruments with a residual maturity not exceeding 13 months, its weighted average duration not exceeding 90 days and its weighted average legal maturity (life) not exceeding 120 days. The Fund's returns are further enhanced by the inclusion of selected, highly rated, corporate paper.

### WHO IS THE FUND SUITABLE FOR?

- Investors seeking a low risk fund to diversify their portfolio.
- Those wishing to "park" their savings for a short period of time as an alternative to a bank deposit.
- Those seeking capital protection but not capital growth.
- Investors who have a one month or longer investment time horizon. Ideally the fund is not suited for lengthy investment terms as it has no exposure to growth assets.

### INVESTMENT PHILOSOPHY AND PROCESS

A disciplined process is followed to arrive at the optimum area of the money market yield curve we wish to invest in. Our fixed interest team researches the full spectrum of money market instruments to achieve the best possible return from short maturity money market instruments, while aiming to deliver the best possible returns with the highest measure of capital protection at all times.

The fund's investments are subject to a stringent risk management process.

The fund, though low risk, is not a bank deposit account, and whilst capital losses are unlikely, they can occur. In this event, losses will be borne by the fund and its investors.

### FEES ON CLASS A (EXCLUDING VAT)

Initial fee: 0%

Annual Management fee: 0.25%

### PERFORMANCE FEE

None

### TOTAL EXPENSE RATIO (TER) AND TRANSACTION COSTS

Cadiz Money Market Fund Class A

## Quarterly Fund Manager Commentary – Second Quarter 2019

Global yields initially rose as global markets exhibited more optimism than the previous quarter. Global growth prospects were positive, inflation seemed well contained and central banks maintained their dovish stance. Yields however started to fall as US-China trade tensions escalated on the back of fears of global supply chain disruption and renewed threats on trade tariffs. By the end of the quarter, sentiment was tested as the market priced in a dovish Fed rate cut in July and potentially another cut later in the year. The local currency started the period at about 14.14 to the USD. After some initial strength, uncertainty ahead of the national elections drove the currency weaker. The election outcome however provided material support for the rand, at a time when other emerging market currencies faltered. The support was short-lived as increased risk aversion in global markets on the back of deteriorating global growth weakened the local currency materially to reach levels above 14.80 to the USD. The rand recovered substantially during the last month of the quarter as markets factored in an implied probability of rate cuts in the US over the coming months.

The local bond market was driven stronger initially by a wave of foreign buying early in the quarter. The inflow however was short-lived as foreigners turned net sellers later in the period. Yields continued to decline albeit at a slower pace as the government elections proved to be relatively painless and inflation continued its benign trend. The JSE All Bond index was up 3.70% for the quarter.

Most of the shift in money market yields occurred in the medium to long end of the curve for the period under review. 3-month NCD yields were down 7.5 basis points while the 6-month, 9-month and 12-month NCD yield declined 32, 32 and 47 basis points respectively. The strength in the longer end was once again prompted by the SARB's decision to keep rates on hold and further speculation of potential rate cuts before the end of the year. Our view currently does not include a rate change at the next MPC meeting but the risk of potential rate cuts has increased.

Factors that will influence the direction of rates in the coming months include currency volatility, weakening global growth and event driven risk such as the probability of a ratings downgrade.

The Fund continues to invest strategically across the money market yield curve to maximise yield while remaining within the risk parameters defined for money market funds. The Fund's retail asset class delivered 1.94% for the quarter while the STeFI composite index was up 1.84%.

# Cadiz Money Market Fund

## Important information regarding terms of use

### GENERAL INFORMATION AND RISKS

1. Collective Investment Schemes in Securities (unit trusts) are generally medium to long-term investments.
2. The value of participatory interests (units) may go down as well as up and past performance is not necessarily a guide to the future. The manager does not guarantee the capital, nor the income of the portfolio.
3. Unit trusts are traded at ruling prices and can engage in scrip lending and borrowing.
4. Portfolios are priced daily and prices can be obtained from the website and in the daily newspapers or on Profile Data. Figures quoted are from Morningstar Inc.
5. Unit trust prices are calculated on a net asset value basis, which is the total value of all assets in the portfolio including any income accruals and less any permissible deductions (brokerage, UST, VAT, auditor's fees, bank charges, trustee and custodian fees and the annual management fee) from the portfolio, divided by the number of units in issue.
6. Different classes of participatory interests apply to this fund and are subject to different fees and charges.
7. Performance is shown for the most expensive class of the Fund and individual investor performance may differ as a result of initial fees, actual investment date, date of any subsequent reinvestment and any dividend withholding tax.
8. A schedule of fees, charges and minimum commissions is available on request from Cadiz Collective Investments.
9. Commissions and incentives may be paid, and if so, are included in the overall costs.
10. The manager has the right to close the portfolio to new investments in order to manage it more efficiently in accordance with the mandate.
11. Cadiz Collective Investments' portfolios are valued daily at 15:00. Instructions must reach Cadiz Collective Investments before 14:00 (11:00 for Cadiz Money Market Fund) to ensure same day value.
12. Transaction costs are necessary costs in administering the fund and impacts the fund returns. They should be considered in isolation as returns may be impacted by many factors over time including market returns, type of fund, the investment decisions of the investment manager and TER.

### IMPORTANT INFORMATION FOR INVESTORS:

#### Total Expense Ratio (TER)

- TER is a measure of a fund's expenses relating to administration of the portfolio expressed as a percentage of the average daily value of the fund over a three year period. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return.
- The sum of the TER and transaction costs is shown as the Total Investment Charge. Since Fund returns are quoted after the deduction of these expenses, the TER and Transaction costs should not be deducted again from the published returns.

#### Regulation 28 Compliance

- Where indicated the fund is managed to comply with Regulation 28 of the Pension Funds Act. Exposures in excess of the limits will be corrected immediately, except where, due to a change in the fair value or characteristic of an asset, e.g. market value fluctuations, in which case they will be corrected within a reasonable time period.
- The Management Company does not monitor compliance by retirement funds with section 19(4) of the Pension Funds Act (item 6 of Table 1 to Regulation 28).

#### Foreign investment risk

The portfolio may include underlying foreign investments. Fluctuations or movements in exchange rates may cause the value of the underlying foreign investments to go up or down. The underlying foreign investments may be adversely affected by political instability as well as exchange controls, changes in taxation, foreign investment policies, restrictions on repatriation of investments and other restrictions and controls that may be imposed by the relevant authorities in the relevant countries.

#### Derivative risk

The use of derivatives may increase the overall risk in the Fund by multiplying the effect of gains and losses.

#### Maximum drawdown

- A maximum drawdown is the maximum loss from peak to trough of a portfolio.
- It is an indicator of downside risk over a specified time period.

#### Sharpe ratio

The sharpe ratio is the average return earned in excess of one risk-free rate per unit of volatility or total risk.

#### Risks associated with investing in fixed interest and Money Market investments

- A money market fund is not a bank deposit account.
- Fluctuations in the market value of the securities in which a fixed income fund invests may have a negative impact on the fund. The income instruments are likely to be especially sensitive to changes in interest rates or changes in the market participants' expectations of how interest rates will change in future.
- There is a risk that certain corporate and other counterparties with whom the manager invests or through whom the manager transacts run into financial difficulty, and are unable to honour their commitments in full, which will lead to a potential loss of capital.
- There is a risk that in a high inflation environment, the securities in the Fund may appreciate at a rate lower than the inflation rate, and as such, the purchasing power of an investor's capital may decline.

#### Complaints

Cadiz Collective Investments are committed to handling client complaints in a timely and fair manner and has implemented systems and procedures to satisfy this commitment. The detailed Complaints Handling and Resolution Procedure is available on the website, or can be requested directly from the manager. A complaint should be lodged in writing with the Compliance Officer at [investorservices@cadiz.co.za](mailto:investorservices@cadiz.co.za)

An investor can obtain, free of charge, additional information on the proposed investment including, but not limited to, brochures, application forms and the annual report and any half-yearly report.

#### About the Management Company

Cadiz Collective Investments (RF) (Pty) Ltd – Co. Reg. NO 2004/032263/07, is registered as a management company under the Collective Investment Schemes Control Act 45 of 2002. It operates 6 unit trust portfolios under the Cadiz Unit Trust scheme, and is supervised by the Financial Services Board ("FSB").
